

Bringing Innovation

Into The World of Colors

Ø ZDHC
Zero Discharge of
Hazardous Chemicals

This year 2022 was 22th year celebration for Garisol. With a small beginning, but with ethical business practice we have managed to complete 2 decades in the industry. We had our ups and downs, happiness and pain, success and failures yet we managed to create newer and newer milestones. All this was possible due to our esteemed customers & well wishers who stood by us this 22 years journey.

From this strong foundation, we have expanded our product lines and services to many industries. Garisol textile printing chemicals is a dynamic and specilizing in providing speciality chemicals to textile printing industries.

Garisol is a leading chemical manufacturer with over two decades of experience in textile printing chemicals industries. The company has since then built a reputation of being one of the most preferred textile printing industries.

NON PVC WATER BASE INKS (MACHINE AND TABLE GRADE)

The Non PVC Water Base Inks are GOTS V6 approved Eco friendly products. Excellent wet-on-wet printing characteristics and comprises a acrylic polymer having curable temperature of 120-160 C. On the 100% cotton fabric Non PVC water base inks print in the time of washing gives color fastness laundering and color fastness rubbing gives 4-5 washes.

NON PVC WATER BASE SPECIALITY INKS

NON PVC WATER BASE AUXILIARIES & PALLET GUM

OX - 5070 Soft White	- Direct screen printing on garments
OX - 5010 Top White	- Direct screen printing on garments
OX - 5005 Bright White	- Direct screen printing on garments
OX - 4010 Ultra White	- Direct screen printing on garments
OX - 5015 Colouring White	- Direct screen printing on garments
OX - 5000 Clear Gel	- Multi purpose gel for all colours
OX - 4000 Eco Clear Gel	- Multi purpose gel for all colours
TG - 310 Opac White	- Direct screen printing on garments
TG - 300 Opac Clear	- Multi purpose gel for all colours
TG - 330 Black	- Direct screen printing on garments
KC - Gel	- Multi purpose gel for all colours
Black Khadi	- Direct screen printing on garments

Direct Colour & Fluorescent Colours are available

OX - 5007 Flock Gel	- Flock printing on garments
OX - 6303 Foil Gel	- Foil printing on garments
OX - 5006 Glitter Gel	- Glitter printing on garments
OX - 7010 Silver/Gold Metallic	- Multiple colour printing on garments
OX - 5008 Puff Base	- Puff printing on garments
OX - 6504 Rex 500 Matt Gel	- Matt finishing and anti foil gel printing on garments

GRDI	- Print Penetrating agent and soft purpose
Soft PG	- Soft purpose in binders
Nylo Paste	- Vinyl rubbing test
G 60 Flow	- Screen choking purpose
Whitner GW 110	- Whiting agent for discharge
Thickner GST	- Thickening agent used for binders
Fixer GX	- Fixing agent used for binders
Vinabond PS Pallet Gum	- Pallet bonding purpose

BINDERS & KHADI

Binders and Khadi used for pigment printing on garments in rotary and table

Binder Print Max 5100	- Pigment printing on garments
Binder Eco 4000	- Pigment printing on garments
Binder Eco 4200	- Pigment printing on garments
Binder LC 2500	- Pigment printing on garments
Binder WB710	- Pigment printing on garments
Binder GS (5500) Paste	- Pigment printing on garments
Binder GS (5200) Paste	- Pigment printing on garments
Binder Eco 100 Water Paste	- Pigment printing on garments
Water Paste	- Pigment printing on garments
KT - 100 White	- Direct screen printing on garments
KT - 300R White	- Direct screen printing on garments

DISCHARGE BASE

Discharge paste used with activator for dry discharge printing on garments. Discharge paste to be used on Machine, Table & Rotary printing.

Denim discharge printing on garments

DC 50 White	- Dry discharge printing on garments
DC 50 Clear	- Dry discharge printing on garments
DC 100 Clear	- Dry discharge printing on garments
DC 500 White	- Dry discharge printing on garments
DC 500 Clear	- Dry discharge printing on garments
DC 500 Denim Bright White	- Denim discharge printing on garments
DC 500 Denim Clear	- Denim discharge printing on garments
DC 600 Bright White	- Dry discharge printing on garments
DC 600 Bright Clear	- Dry discharge printing on garments
DC 850 Bright White	- Dry discharge printing on garments
DC 910 Bright White	- Dry discharge printing on garments
Discharge Activator	- Activator discharge
Denim Activator	- Activate the denim discharge

NON PVC

OIL BASE INKS

The Non PVC Oil Base Inks are Eco friendly products. Excellent wet-on-wet printing characteristics at curable temperature of 140-170 C. On the 100% cotton fabric Non PVC oil base inks print in the time of washing gives color fastness rubbing gives 4-5 washes.

Greenex White	- Direct screen printing on garments
Greenex Colours	- Direct screen printing on garments
Greenex Fluorescent Colours	- Direct screen printing on garments
Greenex Process Colours	- Direct screen printing on garments

NON PVC OIL BASE SPECIALITY INKS

The Non PVC Oil Base Inks are Eco friendly products. Excellent wet-on-wet printing characteristics and comprises a acrylic polymer having curable temperature of 140-170 C. On the 100% cotton fabric Non PVC oil base inks print in the time of washing gives color fastness laundering and color fastness rubbing gives 4-5 washes.

PHATHALATE FREE INKS

PVC based Phthalate free Plastisol inks are free from phthalate, AZO and others used for machine screen printing on garments.

PLASTISOL INKS

PVC based Plastisol inks are free from AZO and others used for machine screen printing on garments.

Greenex Foam Base

- Puff printing on garments

Greenex HD Base

- High density printing on garments

Greenex Soft Base

- Multi purpose gel

Greenex HD Gel

- High rise printing on garments

Greenex Glitters

- Glitter printing on garments

Greenex Foil Gel

- Foil printing on garments

Greenex Glossy Gel

- Glossy effect printing on garments

Greenex Clear Gel

- Multi purpose gel

PH White

- Direct screen printing on garments

PH Direct Colours

- Direct screen printing on garments

PH Fluorescent Colours

- Direct screen printing on garments

PH Process Colours

- Direct screen printing on garments

PH HD Base

- High density printing on garments

PH Foam Base

- Puff printing on garments

PH HD Gel

- High rise printing on garments

PH Flock Gel

- Flock printing on garments

PH Tint Grey

- Opacity printing on garments

PH Soft Base

- Multi purpose gel

PH Thermo Gel

- Multi purpose gel

White

- Direct screen printing on garments

Direct Colours

- Direct screen printing on garments

Fluorescent Colours

- Direct screen printing on garments

Process Colours

- Direct screen printing on garments

HD Base

- High density printing on garments

Foam Base

- Puff printing on garments

HD Gel

- High rise printing on garments

Flock Gel

- Flock printing on garments

Tint Grey

- Opacity printing on garments

Thermo Gel

- Multi purpose gel

Foil Gel

- Multi purpose gel

HD Black

- Direct Black High density printing on garments

HD White

- Direct White High density printing on garments
